

Chamber furnace

Nabertherm 2

Principle

Furnace for heat treatment in air

Manufacturer	Nabertherm
Furnace Type	chamber furnace
Heating System	resistance heating, inside
Useable Volume	base area approx. 80x100mm, height about 100mm
Useable Gases	air
Useable Gas Flow	stationary
Pressure Range	normal pressure
Temperature Range	up to 1800 °C
Optional Equipment	very short heating up to final temperature
