

Chamber Furnace

Nabertherm 4

Principle:

Furnace for heat treatment in air

Manufacturer	Nabertherm
Furnace Type	chamber furnace
Heating System	resistance heating, inside
Useable Volume	base area approx. DIN A5, height about 150 mm
Useable Gases	air
Useable Gas Flow	stationary
Pressure Range	normal pressure
Temperature Range	up to 1100 °C
Optional Equipment	built-in balance provides mass signal of the built-in sample over the temperature profile
