

Convection Oven

ThermConcept KU 40/06/A

Principle

Circulating air oven to measure heat conductivity at elevated temperatures as well as heat treatment of measurement samples.

Manufacturer	ThermConcept
Principle	Cirulating Air Oven
Temperature Range	20 ... 650 °C
Pressure Range	Ambient Pressure
Working Atmosphere	Air
Thermal Output	4 kW
Internal Dimensions (W x H x D)	300 x 300 x 400 mm ³
